

Prop 65 Information

TM Cobb Proposition 65 Statement

The California Safe Drinking Water and Toxic Enforcement Act of 1986, also commonly known as Proposition 65 (Prop 65), was approved to protect California citizens from exposure to toxic chemicals by prohibiting businesses from discharging listed chemicals into known drinking water sources. Prop 65 also requires businesses to provide a "clear and reasonable" warning before exposing anyone in California to a listed chemical (www.oehha.ca.gov/chemicals) more than the allowable level for that substance. New stricter warning labeling regulations from California's Office of Environmental Health Hazard Assessment begin on August 30, 2018.

We at TM Cobb are committed to providing safe and compliant products to our customers. By August 30, 2018 TM Cobb will label all products in response to the new warning regulations. We are also working with our product suppliers to ensure Prop 65 compliance. Below is an example of the label that will be placed on TM Cobb products and/or packaging in order to comply with Prop 65.

WARNING: Cancer and Reproductive Harm
www.P65Warnings.ca.gov

WARNING: Drilling, sawing, sanding, or machining wood products can expose you to wood dust, a substance known to the State of California to cause cancer. Avoid inhaling wood dust or use a dust mask or other safeguards for personal protection. For more information go to www.P65Warnings.ca.gov/wood

A Prop 65 warning label does not necessarily mean that the product is in violation of any product safety regulation, nor that it will eventually cause cancer or reproductive harm. Our products may have traces of listed chemicals, since they are found in many common materials such as wood and steel, used in many of our Door and Millwork products. At this time, TM Cobb will include this warning label on all our products to ensure compliance with Prop 65.

For more information on Prop 65 requirements, see www.p65warnings.ca.gov/
