THERMA-TRU® DOORS

3/6 ENTRY DOOR SOLUTIONS

*EXPERIENCE A **WIDER** WELCOME!*

A grand entrance should do more than enhance curb appeal—it should redefine how you experience your home. While standard doors can appear undersized against modern architectural scales, our 3/6 (42" wide) Therma-Tru® fiberglass doors provide the commanding proportions necessary to maintain a high-end focal point.

Beyond the aesthetic balance, these wider solutions offer enhanced accessibility, creating wide-open possibilities for navigating the daily flow of a busy household with ease.

Whether you are looking for the sophisticated, authentic woodgrain look of the Classic Craft® Collection (available in Walnut, Fir and Mahogany); the sleek, contemporary finish of the Smooth-Star® Collection; or the clean lines, crisp angles and modern designs of the Pulse® Collection, these doors offer the perfect blend of expansive style and everyday convenience.
