HIGH PERFORMANCE DOOR SYSTEM

MANUFACTURED BY T.M. COBB!

PERFORMANCE YOU CAN COUNT ON

Engineered to significantly reduce the possibilities and causes of door and frame failures. The HP System™ saves time and money without sacrificing performance, protection, quality, or attractiveness.

SUPERIOR WEATHER PROTECTION

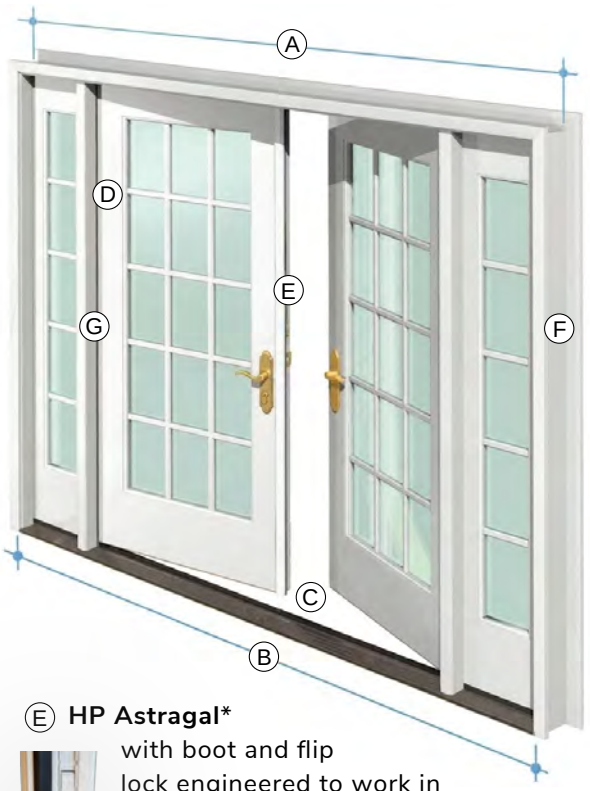

CONTINUOUS CONSTRUCTION

Ⓐ **Continuous Header** provides strength to entire door unit.

Ⓑ **Continuous Sill** machined to work together with our other components, insures integrity to the entire door system.

Ⓒ **Door Bottom** with Leading Edge Bulb design provides increased surface contact with threshold for a superior seal.

Ⓓ **HP Weather-Sealing Components** provide resilience, durability and consistent compression; while our pressure equalizing corner pad provides increased protection for lasting weatherproof seals.

Ⓔ **HP Astragal*** with boot and flip lock engineered to work in tandem with the HP High Dam Sill, forms a perfect seal.

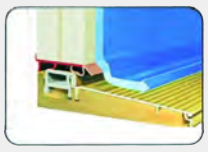

**Exclusively designed for use with Cobb's Multi-Point Locking System*

HP HIGH DAM ADJUSTABLE SILL

- Features an exclusive, patented design with **all synthetic construction**
- An **adjusting cap with a dual seal** overlaps the dam to block water infiltration entirely.

- **High Dam** design eliminates leakage, while narrow threshold cap sits 1/4" behind door panel to prevent water collection

COBBPOSITE™ FRAMEWORK

THE ROT-PROOF SOLUTION

Ⓕ **Exclusive Cobbposite Jamb** installs like wood, but prevents water wicking up from the bottom.

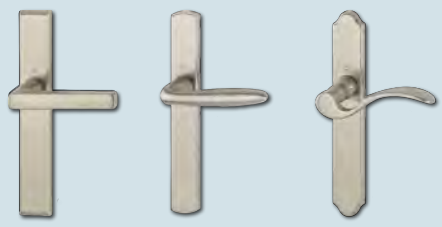

Ⓖ **Cobbposite "T" Mulls** are aluminum reinforced for superior strength and haunched for a perfect fit that does not penetrate the deck of the sill.
