MULTI-FAMILY ENTRY DOOR SYSTEMS

FIBERGLASS & STEEL SOLUTIONS BY THERMA-TRU®

THERMA-TRU® DOORS

At T.M. Cobb, we proudly supply Therma-Tru door systems that are **ideal for multi-family new construction, remodeling, and hospitality projects**. These systems deliver the durability, reliability, and style you expect from the Therma-Tru brand, providing options to meet most national and local building code requirements. Discover an industry-leading selection of Fire-rated doors, Sound Transmission Class (STC) rated doors, and doors featuring an elevated 10" bottom rail for Americans with Disabilities Act (ADA) compliant applications.

SOLUTIONS FOR EVERY CODE & REQUIREMENT

Discover an industry-leading selection of doors designed to meet local and national building codes without sacrificing style.

Explore More

FIRE PROTECTION

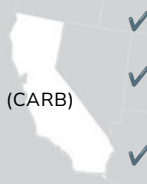

- **Certified Safety:** Intertek/Warnock Hersey certified to withstand a minimum of 20 minutes of fire exposure at temperatures exceeding 1,400°F.
- **Innovative Lighter Core:** Polyurethane foam core reduces overall slab weight by 45% compared to concrete cores for easier installation.
- **Heavy-Duty Durability:** Resists dents, scratches, and rust better than steel, making them **perfect for high-traffic environments**.

Look for the in your Catalog for 20-minute fire-rated options.

For California Projects

Therma-Tru Classic Craft®, Fiber-Classic® and Smooth-Star® 20-minute Fire-rated fiberglass doors meet or exceed building codes and regulations specific to the state of California, including:

- ✔ Wildland Urban Interface (WUI) requirements.
- ✔ Air Resources Board (CARB) formaldehyderegulations.
- ✔ State Fire Marshal test CA SFM 12-7A-1.

ADA-COMPLIANCE

- **Elevated Bottom Rails:** Designed with a minimum 10" net smooth surface to meet Americans with Disabilities Act (ADA) requirements.
- **Public Access Sills:** All-aluminum construction with an ADA-compliant ramp slope.

Look for the **E** in your Catalog for 10" bottom rail options.

NOISE REDUCTION

- **Quiet Comfort:** Commercial-level STC ratings up to 36 paired with a residential look, **ideal for multi-use or urban infill projects**.
- **Engineered Core:** Securely laminated and bonded to the fiberglass skin for a rigid, highly durable assembly.

ENGINEERED TO WORK TOGETHER

Our HP™ High Performance Door Systems feature doors, glass, and components engineered to work together to resist air and water infiltration. They also help maintain energy efficiency and weather resistance.

- **Rot-Free "Cobbposite" Frames:** Eliminates the risk of rot and wood-ingesting insects with a durable, virtually maintenance-free composite material - ***guaranteed for life!***
- **Enhanced Structural Support:** Continuous sills and headers, and reinforced, one-piece mull posts with composite caps ensure total stability and block water absorption.
- **ADA Compliant Options:** Designed to meet high-wind and coastal region codes and regulations.

THE BEAUTY OF CHOICE

Choose from a variety of surfaces to complement your dwelling's architectural style:

Classic Craft®

Fir Grain

Walnut Grain

Fiber-Classic®
